

Nordimpianti System Srl, 66100 Chieti (CH), Italy
Tabone, Sliema, Malta SLM 1602

15 years of successful business in The Middle East

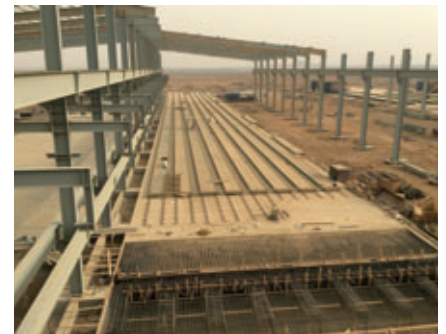

For more than 30 years Nordimpianti has been active in the supply of turnkey plants for the production of a wide range of pre-stressed concrete elements, such as T Beams, hollow core slabs, vineyard posts, lintels and more. Located in the middle of Italy, not too far from the capital Rome, they have delivered plants all over the world from Brazil to Korea to Saudi Arabia. It is a dynamic company which embraces change and has invested heavily in research and development making its plants more efficient and cost effective for its customers. It operates with constant investment in innovation, quality, safety of the products and after sales services in more than 30 countries all over the world.

Xtramix Extruder in UAE producing pre-stressed concrete hollow core slabs

Quality hollow core produced in Mina Abdulla Ind City in Kuwait at High Slant Precast

El Seif Precast have increased their existing 8 beds with another 16 beds at the city of Jizan

Tabone has been in the precast and hollow core scene for around 30 years now, having a regional office also in Dubai for the past 15 years, that makes them more accessible in the Middle East. The drive behind the Tabone brand is the loyalty, relationship and after sales promise to every client.

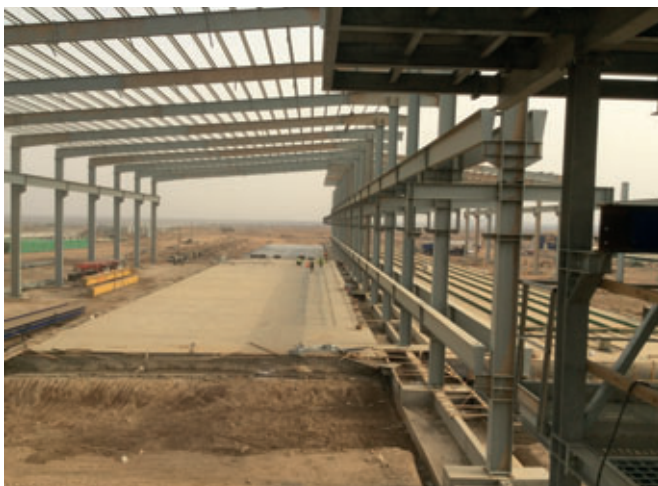

In the recent years a large number of setups have been set up in the Middle Eastern and North African countries satisfying the specific and bespoke requests of the pre-casters' needs in these markets. Nordimpianti has developed a number of technologies including Slipform technology up to 1000

mm, Extruder technology and also Wet casting. In the past ten years we have seen set ups being installed in countries like Kuwait where a number of extruder facilities have been installed with clients including Index Precast and High Slant Precast. The mentioned clients have taken a number of parallel equipment to support the full setup including multi angle saws, multifunction bed cleaners, stressing machines and other.

Nordimpianti extruder comes with a special technology which provides full lubrication

of the gearbox and chains to operate the screws. With this in mind a number of clients including in the Kingdom of Saudi Arabia, Abu Dhabi, Kuwait, Dubai and other regional markets have chosen this technology. Example in point is El Seif precast in Al Kharj, Riyadh who 5 years ago have chosen Nordimpianti's Extruder for the technology that it possesses. In fact only recently El Seif precast have increased their existing 8 beds with another 16 beds for the city of Jizan.

With the ongoing demand that we see in the Middle East, Nordimpianti and Tabone

New extension in Jizan

El Seif Precast – Phase one in al Kharj, KSA

Quality hollow core slabs produced by Xtramix in Abu Dhabi, UAE

have increased further on the ability to have regional service and also spare parts available out of the station in Dubai.

Over the past year the GCC clients are appreciating the quality and after-sales provided. Infact we have seen a number of set ups being set up for clients such as Bahrain Concrete Technology, in Bahrain, and others, is surely resounding feedback on Nordimpianti and Tabone's commitment towards the region.

Tabone has recently also boosted its after-sales and spare-parts department with more personnel as well as by upgrading its warehousing facilities in Dubai. Requests are handled on a same day basis and essential components available on the ground ensure that the clients receive quick response and have low downtime intervals.

Tabone also has engineers on the ground who handle clients' requests directly and also cater for their after-sales needs. The company is always looking at improving its structures and be organized in evaluating clients needs and requirements and it is always looking out to offer a comprehensive service from evaluation and business plan generation to installation, startup and maintenance. ■
